

Complete EFB Solution

Visit bytron.aero

Streamlining workflows with integrated Dispatch, EFB & Flight Watch

The Ground Portal is an integrated flight data management system that includes essential tools for flight operations.

- Flight Dispatch
 Flight Tracking
 Airfield Watch
- NOTAM Watch · Reporting & Analytics

Our Electronic Flight Bag connects seamlessly with the Ground Portal to streamline pilot workflows and improve data capture.

- Digital Briefing
 Journey Log
 Form Builder
- Document Library Tools

"The highly configurable solution provides a useful tool for our pilots, as well as for our Flight Operations and Network Control teams" Paul Smylie, Senior Manager, flydubai

Flight Dispatch

Reduce workloads with all information in one portal, monitor flight progress and generate briefing packs.

- Streamline flight data management
- Over 2 million briefing packs a year are generated and released to the pilots EFB
- Review flight plans, Wx, NOTAMs & charts
- Receive alerts & message crew directly
- Identify potential delays with ops board view
- Update passenger and crew info
- Create notices & attach files to briefing packs such as loadsheets

Flight Tracking

Stay ahead of your aircraft with planned and actual positions, as well as deviation alerts for GADSS compliancy.

- View all flights or focus on a specific aircraft
- Position data taken from ACARS or ADS-B
- Upper wind & temperature and clear air turbulance
- Flight level, WX period & planned positions
- North Atlantic Tracks and Graticule
- Deviated aircraft alerts

Airfield Watch

Improve awareness for your OCC teams, providing a quick and easy overview of changing weather conditions.

- · Colour coded graphics for key weather data
- Airfields automatically added from flight plans
- Wx status changes based on your chosen minima
- Full access to METAR, TAF, SNOWTAM & NOTAM

NOTAM Watch

Ensure the right people receive filtered critical & warning NOTAMs, improving safety awareness.

- Automatically filters irrelevant NOTAMs
- Filter by Q-Code, Series, Airfield, FIR, QFIR, Keyword
- Designate NOTAM alerts to specific people or teams

EFB Digital Briefing

Go paperless, reduce pilot workloads and access interactive OFP & weather maps with real-time data.

- Interactive OFP information
- METAR, TAF, Upper Wind & Temp Charts
- Airfield and FIR NOTAM
- Route plots and ETOPS Charts
- SigWX charts
- SIGMETS / ASHTAMS / Storms
- Notices & alerts

6

- Easily customise or hide fields
- Crewing and delays
- Fuel data & orders, de-icing
- Navigation log
- Ground Services, incident reports
- Integrated quick link apps

Form Builder

Go paperless and create digital forms for the flight crew to complete, streamlining their workflow.

- Create digital forms and send straight to the EFB
- Reduce time delays in communication sharing
- Prepopulated information, requiring less input
- Automatically integrate form data with other systems via the skybook API
- Form data accessible in flight data storage

Aircraft Type	FLT No.
∃ Short Text	∃ Short Text
	opdown

Document Library

Access all documents & aircraft manuals on the EFB. Send to entire fleets, certain aircraft, or specific flights

- Quicker access to specific documents
- No more bulky printed aircraft manuals
- File management for all aircraft
- Easily annotate, highlight and bookmark pages
- Manage version control and audit trail

Name	Owner	Last Modified
330-900	HJ - Captain	22-April-23 11:58 AM

OPERATIONS MANUAL

EFB Tools

Helpful tools for accurate and time saving flight crew calculations.

- Last minute change calculator
- See the impact on the weight & balance, without needing to generate a new loadsheet
- LMC limit warnings
- Add or remove changes to Passengers, Baggage, Hand Luggage and Cargo.
- Configurable for fleet or individual aircraft

Integrations

Connect seamlessly with your existing systems using our integration capabilities.

- Accepts ARINC633 EFF packages from all major Flight Planning Providers
- Works with proprietary OFP data from Sabre
- Recalls Crew Roster and Flight Schedule from AIMS, Blueone and PPS
- · Allows airline to publish its own schedule
- Attach loadsheets, NOTOCs, GENDECs automatically
- · Sends journey log data to other airline systems or third-parties
- Receives and publishes CTOT
- Integrates with FlightAware and ACARS for aircraft positions
- Integrates with JSI for Jeppesen OFPs and desk assignments
- Jeppesen HWS/WSI weather service integration
- Accepts MEL information from AMOS
- Integrates with the NavBlue RAIM service
- Retrieves Oceanic tracks via the Jeppesen bookshelf
- EUROCONTROL and Jeppesen NOTAM feeds
- UKMO and NOAA Weather feeds
- Sends sector status events to customer systems
- Integrates with 3rd Party EFBs such as AVIO & IFS
- Utilises IBM MQ, S/FTP and Web services
- Encrypted communications

Our promise to you

We work closely with you to understand your operating processes, procedures and daily challenges. But most importantly to build an ongoing relationship that benefits your operations.

Bytron Aviation Systems is certified with the ISO 27001 Information Security Management System and ISO 9001 Quality Management System.

Certified Management System

Connecting the workflow of airlines

"skybook represents a truly integrated approach that brings together market-leading functionality for the efficient management of flight data, crew briefing and monitoring operations."

Mathew Buettner - Director, Jeppesen Flight Planning & Dispatch

ISO 27001:2013 & ISO 9001:2015
