

AMP8 compliance and readiness checklist

AMP8 brings the most demanding regulatory, environmental and operational standards the UK water sector has ever faced.

With heightened scrutiny from Ofwat, the EA and DWI, this checklist helps you assess whether your organisation is prepared to deliver on AMP8 requirements across workforce competence, digital enablement, safety culture, and supply-chain assurance.

Click a box to mark as complete

1

Workforce competency and assurance

Have you got this in place?

| | |
|--|--|
| A standardised induction process across all sites and contractors | |
| A single, centralised record of employee and contractor competencies | |
| Evidence that inductions, training and assessments are up-to-date | |
| Ability to verify and audit contractor qualifications instantly | |
| Automated renewal reminders to avoid expired training or documents | |
| Competency assessments linked to job roles, tasks, and risk levels | |

2

Contractor management and supply-chain control

Have you got this in place?

| | |
|---|--|
| A unified contractor onboarding process across the organisation | |
| A system for verifying external workers' identity, permissions and certifications | |
| Site-specific or activity-specific inductions for temporary and third-party staff | |
| A way to restrict site access if induction or training is incomplete | |
| A trail showing contractor learning, behaviour and compliance | |
| Clear audit data demonstrating consistent oversight | |

3

Digital enablement and system integration

Have you got this in place?

| | |
|---|--|
| A single platform for inductions, training, document control and contractor oversight | |
| Elimination of paper-based sign-offs and siloed spreadsheets | |
| Real-time compliance dashboards | |
| Integration with HR, safety or site access systems | |
| Scalability to support thousands of workers and multiple sites | |
| A central library for controlled policies and safety documents | |

4

Safety culture and environmental accountability

Have you got this in place?

| | |
|--|--|
| Training tailored to high-risk tasks, confined spaces, and operational hazards | |
| Environmental awareness modules (pollution prevention, spill response) | |
| Consistent site rules communicated before arrival | |
| Competency tracking for safety-critical roles | |
| Evidence of behaviour-based safety learning | |
| Visibility of who is trained, approved, suspended or non-compliant | |

5

Regulatory evidence and audit readiness

Have you got this in place?

| | |
|---|--|
| Instant access to audit-ready reporting | |
| Timestamped records of inductions, training and approvals | |
| Digital signatures and verification mechanisms | |
| Documented governance showing how competence is assured | |
| Version control for training and compliance content | |
| Ability to produce evidence during regulatory inspections | |

6

Accessibility and inclusion requirements

Have you got this in place?

| | |
|---|--|
| WCAG 2.2 AA compliant training and induction content | |
| No colour-dependent indicators (RAG) without text/icons | |
| Captioned or transcript-supported learning content | |
| Accessible UX for visually impaired or neurodiverse users | |
| Commitment to digital inclusion across contractor systems | |
| Vendor systems that meet Public Sector Bodies Accessibility Regulations | |

7

AMP8 operational readiness

Have you got this in place?

| | |
|---|--|
| Consistency across all sites, alliances and operational areas | |
| Scalable processes for major programmes or surge resource needs | |
| Visibility and control across thousands of contractors | |
| Rapid onboarding during incidents or programme surges | |
| Assurance that approved workers remain fully competent | |
